CONTENTS OF VOLUME 6

Volume 6 Numbers 1/2 January–April 1991

Papers from Australia

1 **Editorial**

3 **Theory of channel optical waveguides**
K. S. Chiang

15 **Soliton interaction in optical fibre couplers**
A. Ankiewicz and G.-D. Peng

23 **Sub-Poisson light from GaAlAs infrared emitting diodes**
P. J. Edwards

29 **Optical bistability in a hydrogenated amorphous silicon Fabry–Perot etalon**
Z. Y. Xu, J. Tann, M. Gal, K. Gaughan, I. Viohl and P. C. Taylor

35 **Surface wave polarizer for optical fibres**
R. Dragila and S. Vukovic

47 **Optical amplifiers based on phosphorus co-doped rare-earth-doped optical fibres**
R. A. Betts, F. F. Rühl, T. M. Kwok and G. F. Zheng

65 **Comparison of stress distributions between mechanically homogeneous and inhomogeneous fibres**
D. Wong and P. L. Chu

83 **Evaluation of a colour glass filter for extended distance fibre-optic temperature sensing**
P. J. Samson and P. C. Hills

91 **Assessment of special fibres for distributed anti-Stokes Raman ratio thermometry**
G. W. Bryant, A. T. Paton, J. C. Scott and A. D. Stuart

101 **Theory of acoustic sensing using optical fibres**
Y. Zhao and M. G. Sceats

117 **Flow profile modelling at the immersed tip of an optical fibre and its application to the fibre-optic laser Doppler anemometer**
S. C. Tjin, P. R. Johnston and D. Kirkpatrick

127 **Fibre-optic coupler fabrication at AOFR**
A. J. Stevenson and S. A. Barr

145 **OSNET™— an engineered fibre-optic sensing system for industrial applications**
M. C. Elias and S. J. Strach

165 **Hybrid optical/electronic imaging systems**
C. J. R. Sheppard and C. J. Cogswell

177 **An artificial seeing system copying insect vision**
G. A. Horridge and P. Sobey

Volume 6 Number 3 May–June 1991

Papers from OSCA

195 **Editorial**

197 **A study of fibre-optic techniques for gas sensing**
C. A. Wade and I. Bennion

217 **Remote multiplexed fibre-optic laser-diode spectroscopy for gas sensing**
B. C. H. Turton, A. Mohebati and T. A. King

227 **Evanescent-wave chemical sensors – a theoretical evaluation**
G. Stewart, J. Norris, D. F. Clark and B. Culshaw

Regular papers

239 **Invited paper: Semiconductor wavelength tunable optical filters**
T. Numai

253 **On the potential of human vision systems and anthropomorphic technical systems**
V. M. Ginzberg

265 **A generalized, programmable integrated optical matrix processor using frequency multiplexed SAW acousto-electro-optic effect**
C. De Cusatis, P. Das and D. M. Litynski

285 **Developments in optical sensors for use in vehicles**
C. P. Cockshott

293 **Letter: Anomalous wavelength dependence of microbending losses in single-mode fibres**
H. Renner

301 **Letter: The effects of contrast on time/space multiplexed grey scale in monotonic SLMs**
A. R. L. Travis and S. R. Lang

Volume 6 Number 4 July–August 1991

OSCA papers

305 **Optical sensing techniques in flowmetering**
G. Dickinson

319 **An optically-addressed vortex-shedder flow-meter**
B. C. B. Chu, T. P. Newson, A. S. Gerges and D. A. Jackson

333 **Differential-pressure transmitter with fibre-optic links using wavelength modulation**
B. E. Jones and R. C. Spooncer

Regular papers

339 **Invited paper: Recent advances in electro-optic coherence multiplexing**
J.-P. Goedgebuer, H. Porte and R. Ferriere

357 **Influence of field-dependent carrier mobility and surface preparation of GaAs samples in optoelectronic switching experiments**
H. Bergner, V. Brückner, M. Lenzner, H. Li and R. Strobel

365 **Analysis of Zn-diffused semiconductor slab waveguides: exact solution and WKB approximation**
C. Wu, T. Touam and S. I. Najafi

385 **Development of high temperature humidity sensors based on porous optical fibers**
J. Y. Ding, M. R. Shahriari and G. H. Sigel, Jr.

395 **Measurement of a water surface using the image of a grating-edge detection using a Gaussian function**
J. Kurata, K. T. V. Grattan, H. Uchiyama and T. Tanaka

Volume 6 Number 5 September–October 1991

Medical Optoelectronics

405 **Editorial**

407 **pH measurements with dyes co-immobilization on optodes: principles and associated instrumentation**
G. Boisde, F. Blanc and X. Machuron-Mandard

425 **Biomedical applications of fibre optic chemical sensors**
O. S. Wolfbeis

443 ***In vivo* entero–gastric reflux detection by optical fibres**
R. Falciai, F. Baldini, P. Bechi and F. Cosi

451 **The use of multichannel infrared fibre optic sensors for controlled microwave heating**
S. Drizlikh, A. Zur and A. Katzir

459 **Biomedical applications of excimer lasers**
R. Salimbeni, R. Pini and R. Pratesi

479 **Laser-induced fluorescence in biomedical applications**
R. Cubeddu, F. Docchio, R. Ramponi and P. Taroni

491 **Holography and endoscopy**
G. von Bally

503 **The clinical application of low incident power density 830 nm GaAlAs diode laser radiation in the therapy of chronic intractable pain: A historical and optoelectronic rationale and clinical review**
K. C. Moore and R. G. Calderhead

Volume 6 Number 6 November–December 1991

OSCA papers

521 **Wavelength division multiplexed optical-fibre sensor systems and networks**
J. M. Senior and S. D. Cusworth

539 **Incremental control of a valve actuator employing optopneumatic conversion**
K. F. Hale, C. Clark, R. F. Duggan and B. E. Jones

545 **The safety of optical systems in hazardous areas**
G. Tortoishell

Regular papers

553 **Investigation of optical tapers by means of selective mode excitation**
T. Eftimov, T. Kortenski and T. Vulkova

565 **Laser noise characteristics in fibre optic analogue transmission**
Y. Takahashi, T. P. Tanaka and H. Nakano

575 **Fully planar ion-exchanged glass channel waveguides with grating taps**
M.-J. Li and S. I. Najafi

579 **A fast light source for photogeneration of free charge carriers in time of flight experiments**
S. M. Vaezi-Nejad and D. B. Shiers

Short communication

595 **A new delayed self-homodyne technique for laser spectral linewidth measurement**
M. Ferreira, S. Hamidi, X. Shan, A. S. Siddiqui, Z. S. Siddiqui and D. Simeonidou

589 **Book reviews**

591 **Index of authors**
